s01–s02
SIAGAS well inventory
QA/QC protocol
s03–s04
Lithological harmonisation
3-D weathering surfaces
s05–s05c
Covariates: terrain, structural,
airborne geophysics
s06
Training matrix
region-relative q75 target
s06
Models: RF · XGB · ensemble
fuzzy expert baseline
s07 · s07e
Spatial block cross-validation
external test
s08b–s08c
Favourability map, uncertainty,
classes with observed rates
measured on the target,
before any model is scored
Predictability ceiling
neighbour AUC · nugget
zone-support test
Acceptance bar
0.95 × measured ceiling
Covariate adoption rule
declared before the result
re-enters the matrix only if adopted
Airborne geophysics
spatial 0.650→0.660
external 0.563→0.593
ADOPTED
Regression-kriging of surfaces
CV RMSE −0.3% to −2.1%
(rule asked −5%)
NOT ADOPTED
